

FY1 & FY2 PHARMACY TEACHING PROGRAMME

MEDICINES OPTIMISATION

Explore how to enhance patient outcomes by reviewing and streamlining medications. Learn the key strategies to ensure the right drug is used at the right dose, at the right time.

ELECTROLYTE IMBALANCES AND IV FLUIDS

Doesn't take much to cause an electrolyte imbalance and medicines can be a major causative factor. Know your medicines and treatment options when faced with deranged U&Es

OPIOIDS: EVIDENCE BASED MEDICINE

Delve into the safe and effective use of opioids with evidence-based guidance. Understand the latest research on managing pain while minimizing risks like addiction and overdose.

CLOZAPINE: HIGH RISK MEDICINE

Learn about the safe use of clozapine, a high-risk medication. Understand monitoring requirements and how to manage potential side effects to ensure patient safety.

SLIPS, TRIPS AND FALLS

Gain insights into preventing and managing falls in clinical practice. Review combinations of medicines that put patients at unnecessary risk of falls.

WEIGHT MANAGEMENT : EVIDENCE BASED MEDICINE

Understand the latest evidence on managing weight and obesity. Explore pharmacological and lifestyle interventions that support long-term health and prevent related conditions.

FY1 & FY2 PHARMACY TEACHING PROGRAMME

STROKE: EVIDENCE BASED MEDICINE

Learn the best practices for managing stroke patients, from prevention to acute treatment. This session highlights the latest evidence to optimize outcomes for those affected by stroke.

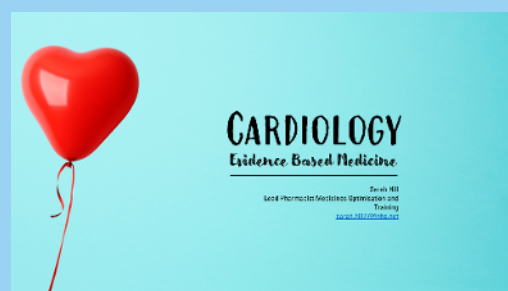

DIABETES: EVIDENCE BASED MEDICINE

Explore evidence-based approaches to diabetes management. Focus on optimizing treatment, improving patient outcomes, and staying current with the latest therapeutic options.

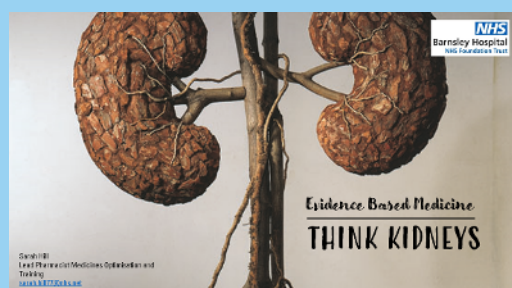

INHALERS : EVIDENCE BASED MEDICINE

Master the effective use of inhalers for respiratory conditions. This session covers inhaler technique, drug options, and evidence-backed strategies to improve patient adherence and outcomes.

CARDIOLOGY: EVIDENCE BASED MEDICINE

Dive into the latest evidence on managing cardiovascular conditions. Learn best practices for diagnosing, treating, and preventing heart disease using up-to-date clinical guidelines.

THINK KIDNEYS: EVIDENCE BASED MEDICINE

Enhance your understanding of kidney health with evidence-based strategies for prevention, diagnosis, and treatment of kidney disease. Focus on the latest research to optimise renal care.

MANAGING THE SICK PATIENT

Gain the skills to manage medicines in sepsis effectively, focusing on timely treatment, and optimal use of medications to improve survival and outcomes for critically ill patients.
