

PHASE 3A PHARMACY TEACHING PROGRAMME

PREScribing FOR OLDER PATIENTS POLYPHARMACY AND MEDICINES OPTIMISATION

Learn how to safely prescribe for older patients by optimizing medications and managing polypharmacy. Balance treatment benefits with the risk of side effects in an ageing population.

PAEDIATRICS PRESCRIBING SAFELY

Prescribing for children requires special care. Learn about safe dosing, choosing the right medications, and understanding age-related differences to ensure the best care for your youngest patients.

PREGNANCY & BREASTFEEDING: CHOOSING THE RIGHT MEDICINE

When prescribing during pregnancy and breastfeeding, safety is key. Select medications that protect both mother and baby while managing health conditions effectively.
